

The addition of methotrexate reduces infusion reactions¹

No new safety signals were identified

Most common adverse reactions occurring in $\geq 5\%$ of patients, KRYSTEXXA with methotrexate vs KRYSTEXXA alone over a 12-month period ¹		
Adverse reaction	KRYSTEXXA with MTX (n=96) n(%)	KRYSTEXXA alone (n=49) n(%)
Gout flare*	64 (67%)	35 (71%)
Arthralgia	13 (14%)	5 (10%)
COVID-19	9 (9%)	3 (6%)
Nausea	5 (5%)	6 (12%)
Fatigue	5 (5%)	2 (4%)
Infusion reaction	4 (4%) [†]	15 (31%)
Hypertension	1 (1%)	3 (6%)
Pain in extremity	1 (1%)	3 (6%)
Vomiting	0	4 (8%)

87% relative reduction in infusion reactions when co-administered with methotrexate^{1‡}

*Mobilization flares at the beginning of treatment can be a sign KRYSTEXXA is working.¹

[†]Included one case of anaphylaxis.¹

[‡]4% KRYSTEXXA with methotrexate vs 31% KRYSTEXXA alone.¹
MTX, methotrexate.

Please see Important Safety Information on back cover of the infusion kit and enclosed Full Prescribing Information, including Boxed Warning.

KRYSTEXXA[®]
peglicase

Among patients who experienced an infusion reaction, the majority occurred by the second infusion²

	KRYSTEXXA with MTX (n=96) n(%)	KRYSTEXXA alone (n=49) n(%)
Infusion 1	1 (1%)	4 (8%)
Infusion 2	2 (2%)	7 (14%)
Infusion 3	0	3 (6%)
Infusion 10	0	1 (2%)
Infusion 13	1 (1%)	0
Any infusion reaction or anaphylactic reaction	4 (4%)	15 (31%)

If an infusion reaction occurs during the administration of KRYSTEXXA, the infusion may be slowed, or stopped and restarted at a slower rate, at the discretion of the healthcare provider.¹

PATIENT FAQ

What does an infusion reaction to KRYSTEXXA feel like?

Everyone's body is different and everybody reacts differently to medications. Infusion reactions can begin with a tickle in your throat, itchy skin, chills or a fever, skin rash, chest discomfort, difficulty breathing, or feeling faint. Seek medical care immediately if you experience any symptoms of an allergic reaction during or at any time after the infusion of KRYSTEXXA.^{1,3}
